

KOREA MARKET DATA, IN ENGLISH

SeoulMarkets

The first English-language data product built directly from Korea's own regulatory filings — ownership, workforce, mezzanine debt, valuation and index composition — not translated commentary, the underlying rows.

6 datasets, live today

REST API + CSV/Parquet

Listed on RapidAPI

Korea Financial Statements Tape

Annual filings for the Korean stock market, consolidated and separate reported separately — the raw statement lines behind every ratio, not just the ratio.

2,570 / 2,709

listed companies covered (94.9%)

FY2025

most recent annual report cycle

DART

Financial Supervisory Service, official open API

COLUMN	COLUMN	COLUMN
ticker	name_en	industry_en
fiscal_year	report (annual/half-year)	basis (consolidated/separate)
total_assets_krw	total_equity_krw	net_income_krw
revenue_krw	operating_income_krw	not_measured (reason, never zero)

UPDATE	FORMAT	COVERAGE RULE
Rebuilt each session; DART re-checked continuously	CSV · Parquet	Rows kept even when unmeasured, with a reason column

Korea Valuation Tape

PER, PBR, ROE and debt-to-equity for every listed company, computed from the tape above — same table, same day, so the ratio and the statement line can never disagree.

2,709
listed companies, every one kept

1,588
with a computed PER (rest: loss or unfiled, stated why)

2,556 / 2,562
with PBR / ROE

COLUMN	COLUMN	COLUMN
per	pbr	roe
debt_to_equity	market_cap_krw	price_as_of
fiscal_year	basis	not_measured (reason)

UPDATE	FORMAT	RULE
Daily price join, on the current annual statement set	CSV · Parquet	No sector averages computed. Null, never negative-or-zero-by-default

Korea Ownership Ledger

Every substantial-shareholding (5%-rule) filing and officer/major-shareholder ownership record, at filing level — who crossed a threshold, and by how much, on which day.

21,774

large-holding (5%-rule) filings

32,000+

officer / major-shareholder ownership rows

2,547

tickers with at least one filing

COLUMN	COLUMN	COLUMN
filing_id	filed_on	holder_name
shares_held	shares_change	stake_pct / stake_change_pct
related_party_shares	related_party_pct	reason_raw_ko (original text)
UPDATE	FORMAT	RULE
Rebuilt each session from DART majorstock/elestock	CSV · Parquet (two tables: filings + executives)	Holder names printed as filed, never guessed into romanized form

Korea People Panel

Headcount, tenure and annual pay per person, split by gender, joined to market cap — the workforce axis competitors that cover Korean financials do not carry at all.

2,924

listed companies with workforce filings

22

columns per company

No vendor found

publishing this axis for Korea, in English

COLUMN	COLUMN	COLUMN
headcount	women_share	tenure_years_men / women
annual_pay_per_person_krw_men	annual_pay_per_person_krw_women	pay_ratio_women_to_men
pay_ratio_withheld_reason	market_cap_krw	price_as_of

UPDATE	FORMAT	RULE
Annual filing cycle + daily price join	CSV · Parquet	Ratios shown as distribution, never averaged into a single "norm"

Korea Mezzanine Book

Convertible bonds, bonds-with-warrants and exchangeable bonds — strike terms, refix floors and placement type, as filed, with the three instruments' differently-named DART fields normalized into one comparable table.

5,084
CB / BW / EB issuances

98.3%
were private placements, not public offerings

3 instruments
unified into one schema, kept distinguishable

COLUMN	COLUMN	COLUMN
instrument_type (CB/BW/EB)	total_face_value_krw	coupon_rate_pct
strike_price_krw	strike_ratio_pct	strike_window_start / end
refix_floor_price_krw	refix_floor_note	private_placement

UPDATE	FORMAT	RULE
Rebuilt each session from DART issuance filings	CSV · Parquet	EB's missing refix column marked "not applicable", never zero

Korea Index Tape

Every KRX, KOSPI, KOSDAQ and thematic index KRX publishes, in English — the index universe most vendors leave in Korean-only filings.

168 KRX indices, English names	Daily close, change, constituent count, base date	API today CSV/Parquet snapshot in progress — not yet shipped
COLUMN name_en close / change / change_pct	COLUMN family_en (KOSPI/KOSDAQ series) year_high / year_low	COLUMN constituent_count base_date / base_index
UPDATE Daily	FORMAT Live via REST API today; file snapshot next	RULE Full market cap shown, not the free-float index weight — labeled as such
